Quick Heal
Total Shield

For all-round protection from viruses, malware, harmful websites, and other online threats.

Features List

Total Shield

- Ransomware Protection
- Web Security
- Email Security
- Safe Banking
- Browser SandBox
- Data Theft Protection
- Parental Control
- Firewall
- Core Protection
- Malware Protection
- Anti Keylogger
- Improved Scan Engine
- Quick Heal Remote Device Management(RDM)
- Advanced DNAScan
- Vulnerability Scan
- Virtual Keyboard
- Privacy Protection
- Flash Drive Protection
- Safe Mode Protection
- Enhanced Self Protection
- Silent Mode
- Import and Export Settings
- RC Tuner
- Track My Laptop
- Stay Connected

Product Highlights

- Safe Banking protects your financial information while you shop, bank and pay your bills online.
- Automatically blocks access to websites that can infect your PC or steal your personal information.
- Blocks emails carrying links or attachments that are infected or designed for phishing attacks.
- Prevents data-stealing programs such as keyloggers from recording what you type on your keyboard.
- Protects your data from getting copied by unauthorized storage devices.
- Ensures that your children stay safe from inappropriate websites, and use the Internet constructively.
- Helps your PC perform better for multitasking and power-hungry tasks.

Total Shield

Quick Heal
Total Shield

For all-round protection from viruses, malware, harmful websites, and other online threats.

Quick Heal AV Pro tough on malware, light on your PC.

Firewall Protection (2-Way Protection)

- Firewall Protection ensures 2-way protection and scans both incoming and outgoing Internet communication.

Full Scan

- Quick Heal AntiVirus Pro offers a couple of scan options. You can scan on demand, schedule scans, or scan certain files and folders. Full Scan initiates a complete scan of all boot records, drives, folders, files, and vulnerabilities on your computer.Once Full Scan is done, only new files are scanned in future and thus it optimizes scanning requirement.

Boot Scan

- Cleans even highly infected systems. Some viruses tend to be active if the system is running and they cannot be cleaned. Boot Time Scan starts scanning on next boot using Windows NT Boot Shell to clean stringent viruses. Screen Locker Protection. Dodges malwares that lock the screen preventing access to your computer rendering it useless. You can create a short-cut key combination to initiate a clean-up of your computer and remove malicious programs bypassing such attempts.

Emergency Disk

- Sometimes rootkits reappear even after anti-rootkit scanning. Hence, you can use Quick Heal Emergency Disk for complete cleaning.

Browser Protection

- Browser Protection ensures that malwares embedded in browsers do not access folders on your computer.

Hijack Restore

- Helps you restore the default settings of Internet Explorer modified by malwares, spywares, or even by you.

USB Drive Protection

- Stops autorun malware of the USB drive to curb spread of malware to your system.

SEQRITE

Surf the online world safely

Browsing Protection

- Blocks suspicious and harmful websites that can download malwares and worms to your PC or steal your data.

Prevent Ransomware attacks

Ransomware Protection

- Keeps your data and PC safe from ransomware attacks.
- Smart data backup and restore features act as a safety net to get your valuable data back in case of a ransomware attack.

Protect against data stealing

Anti-Keylogger

- Blocks all keystrokes spyware that can record your data and send to the hacker.

Robust and proven scan engine

Virus Protection

- Blocks virus infections that try to infect computer programs to gain admin control and steal data.

Malware Protection

- Detects all kinds of malware,viruses,worms,Trojans,and spyware that try to inflict your PC from various sources and removes them instantly.

Advance DNAScan

- Keeps an eye on all the running programs on your PC to trace any suspicious behavior. DNAScan, our indigenous and proven detection mechanism, detects new and unknown malicious threats based on behavioral classification of the documents and files.

Seqrite
Endpoint Security (EPS)

Simple and Comprehensive
Endpoint Security for workstations, laptops and servers.

Seqrite endpoint security is a simple and comprehensive platform which integrates innovative technologies like Anti Ransomware, Advanced DNA Scan, and Behavioural Detection System to protect your network from today's advanced threats.It offers wide range of advanced features like Advanced Device Control, DLP, Vulnerability Scan, Patch Management, Web Filtering, Asset Management, etc. under a single platform to enable organizations to ensure complete security and enforce control.

Why Seqrite Endpoint Security?

1 **Comprehensive Endpoint Security and Control**
Seqrite Endpoint Security is a simple yet powerful platform to manage security and helps to enforce control over data, application, web access with a wide range of features such as Advanced Device Control, DLP, Asset Management, Application Control, etc

2 **Multilayered Protection**
Seqrite Endpoint Security is certified by various industry certifications and integrates innovative technologies like Advanced DNA Scan, Behaviour Detection, Anti Ransomware to protect your systems from malware and advanced threats at different levels

3 **Scan and patch application vulnerabilities**
Seqrite Endpoint Security detects application and operating system vulnerabilities and also helps to fix those by installing missing patches. Regular updating of applications makes network less vulnerable to malware attacks.

4 **Centralized Management and Control**
User friendly interface for monitoring, configuring and managing systems in the network with detailed report and graphical dashboard. Primary and Secondary Server architecture to manage distributed network effectively.

Feature Description

- Core Protection
- Device Control and DLP
- Vulnerability Scan and Patch Management
- Application and Asset Management
- Management and Control
- Network Protection
- Web Protection

SEQRITE

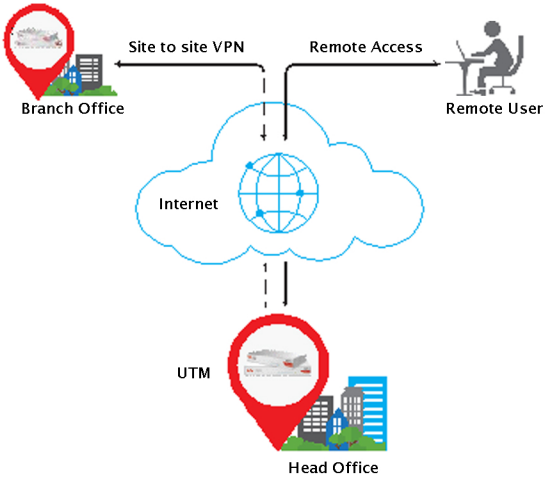
Seqrite
Unified Threat Management (UTM)

UTM Solution for SOHOs and SMBs

Seqrite UTM Features

- Networking
- Administration
- User Authentication
- Centralized Management System
- Bandwith management
- Firewall and Security Features
- Monitoring & Reporting
- Mail Protection
- High Availability
- URL Filtering
- VPN

Secure, Safe and Virus-Free Network with UTM



UTM Product Highlights

» Easy deployment and management.

» Plug-and-play solution without manual intervention or changes.

» Detects and prevents intrusion and protect networks from hackers who can sneak into the system.

» Allows multiple ISPs to be used by UTM.

» Automatically diverts data traffic from inactive ISP to active ISP lines.

» Administrators can control access to applications by configuring rules.

» Provides comprehensive logging and reporting with a user-friendly web-based configuration.

» Easily available customer support and consultation.

Seqrite

Endpoint Security Cloud

Simple, comprehensive cloud based endpoint security for workstations, laptops and servers

Seqrite Endpoint Security Cloud is a simple and comprehensive platform that lets you manage the security for multiple endpoints remotely from anywhere. Whether you're on the move, at work or at home, Seqrite EPS Cloud ensures complete security with easy manageability. It offers a wide range of advanced features like Advanced Device Control, DLP, Web Filtering, Asset Management etc. to ensure complete security and enforce control.

Why Seqrite Endpoint Security Cloud?

1

Comprehensive Endpoint Security and Control

Seqrite Endpoint Security Cloud is a simple yet powerful platform to manage security and helps to enforce control over data, application, web access with a wide range of features such as Advanced Device Control, DLP, Asset Management,Application Control, etc

2

Multilayered Protection

Seqrite Endpoint Security is certified by various industry certifications and integrates innovative technologies like Advanced DNA Scan, Behaviour Detection, Anti Ransomware to protect your system from malware and advanced threats at different levels

3

Less Technical Expertise to Manage Endpoint Security Solution

It does not need a dedicated technical staff to manage the security solution.It is hosted on cloud and gets upgraded automatically requiring no resource involvement and technical expertise. It provides faster delivery of product upgrades which automatically gets rolled out to endpoints

4

Centralized Management and Control

User friendly interface for monitoring, configuring and managing systems in the network with detailed report and graphical dashboard. Primary and Secondary Server architecture to manage distributed network effectively.

Seqrite
Workspace

SEQRITE

Protect Corporate Data and Enhance Workforce Productivity with Secured Workspace

Seqrite Workspace Offers These Powerful Capabilities

- **Email, Calender and Contacts**
- **Secure Browser**
- **Data Loss Prevention (DLP)**
- **Intelligent Camera**
- **Workspace Remote - Wipe**
- **Vault**
- **Easy Text**
- **Single Sign-On (SSO)**

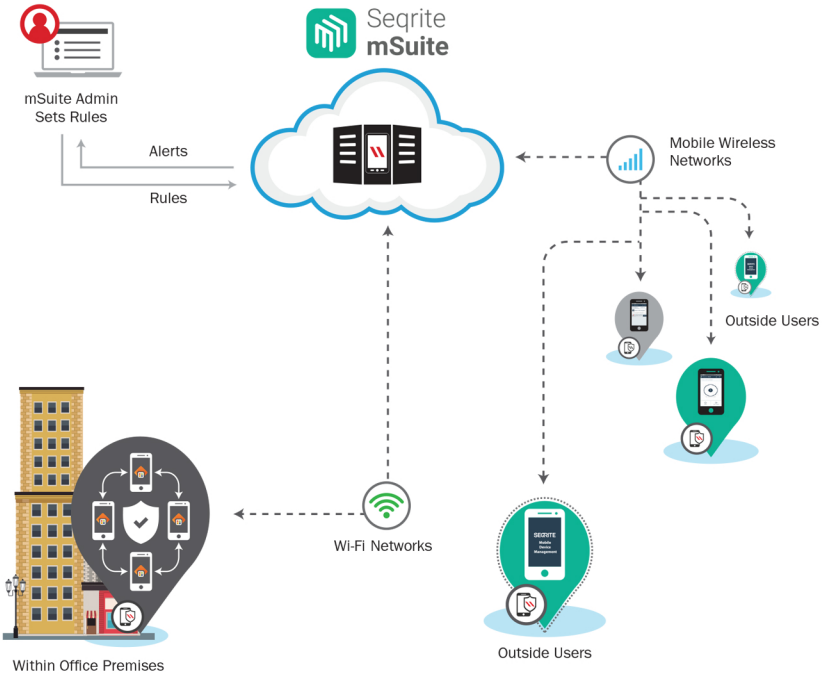
Benefits

- **Secure enterprise data residing on employees' personal devices**
- **Increase employee availability with flexible access to enterprise data, anytime & from anywhere**
- **Boost business productivity owing to improved employee access**
- **Enhance workforce experience by enabling the availability of secured business data through a single application**
- **Immersive and engaging interface foremployees and stakeholders**

Seqrite

MSuite

Seqrite mSuite is a simple and comprehensive yet extremely powerful tool to manage all your mobile devices running on Android and iOS. It allows the network manager to get total control over the apps being installed on official devices, monitor the internet usage patterns, track the device location, apply policies as per location and time and provide support through remote device control as well as file transfer. This allows the organization to remain in total control of what's happening with its data even beyond their own network



- **Single Console Management For All Devices**
- **App Management, Launcher and Kiosk Mode**
- **Comprehensive Mobile Security And Anti-Theft**
- **Fencing and Data Monitoring**
- **Reporting & Summary**
- **Remote Trouble Shooting & Data Transfer**

Cyber Services

Seqrite Services is the cybersecurity services arm of Seqrite.

Your expertise and our solutions help differentiate and grow your business.

SEQRITE Services provides vendor agnostic, holistic and comprehensive consulting services. We help organizations proactively protect IT assets and respond against cybersecurity threats, comply with regulatory and compliance frameworks. SEQRITE Services delivers cybersecurity services and solutions to Corporates, PSUs, Government and Law Enforcement agencies across the globe.
Our services include cybersecurity, governance & riskassessments, Cyber Threat Intelligence, CyberIncident Response and managed cyber security services. We also offer highly specialised hands-on cyber security trainings across spectrum of Security Teams, IT Teams, Incident Responders and Board & Senior Management.

Pro-Active Services

Technical Audit
- Infrastructure Security
- Application Security
- Industrial Control Systems (ICS) Security

Compliance Audit
- ISO 27001
- CoBIT Framework
- PCI DSS
- PA DSS
- ISO 22301 – BCM

Red TeamAudit
- ReadinessAssessments
- Red Team Assessments
- War Games

Security Management
- Risk Assessment
- 2-Factor Authentication
- Database Activity Monitoring
- Information Rights Management
- Web Application Security

Security Consulting
- Security Awareness Programs
- Defining Security Metrics
- Strategy Drafting
- Creating Policies & Procedures
- Infrastructure Architecture Recommendation & Implementation

Active Services

Real Time Monitoring
- Uptime & Performance Monitoring
- Security Incident and Event Management
- Log Monitoring, Correlation and Analysis
- Real Time Cyber Threat Attack Tracking & Monitoring

Security OperationsCentre (SOC) Operations
- SoC Designing and Team Building
- External support to SoC Team
- Outsourced SoC Operations

Re-Active Services

CERT as a Service
- Outsourced CERT/CSIRT
- Incident Handling
- Artifact Handling
- Vulnerability Handling

Incident Response
- Breach Investigation and Mitigation
- Malware Analysis
- Ransomware Investigation
- Targeted Threat Hunting
- Incident Response Retainer Services

Digital Forensics
- Endpoint Forensics
- Mobile Forensics
- Data Leakage Analysis
- Data Collection Services
- Intellectual Property Theft
